Tampere 2008: Discussion

- Why do we want ICT in the education programme of chronically ill children during hospitalisation or ill at home?
- Do teachers/consultants who are involved with ill children need ICT?
- What kind of ICT do we need?
- How can we realise the ICT we would like to offer them?
- What do we need besides money?

ZIEZON

What did we realise in Holland before Tampere, june 2008:

- Website www.ziezon.nl
- Volhouders: a registration and administration system: www.volhouders.nl
- Project “ClassContact”:
Hardware: to connect ill children and their home-schools: about 17 sets (june 2008)

ZIEZON

What does Ziezon plan to do next year (1) ?

- **Starting an European project:**

The overall aim of the proposal is to promote the right to education for chronically and long-term ill children in all member states of the European Union and to contribute to the achievement of this right. The main point is to focus is put on ICT as a mean to guarantee quality education for this particular group. Legal, technical, pedagogical, organisational and financial aspects of setting up and running schemes that offer ICT supported education to ill children in hospitals and at home will be explored by the partnership.
